1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 18 and 21, drawn to a method for determining the storage state of ammonia storing SCR catalyst, classified in class 436, subclass 37.
 - II. Claims 15-17, drawn to apparatus for sensing impedance of a material, classified in class 324, subclass 691.
 - III. Claims 19-20, drawn to apparatus for measuring thermal electromotive force of a material, classified in class 374.
 - IV. Claims 22-23, drawn to apparatus for measuring mass change of a material, classified in class 73, subclass 580.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions I and II-IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed does not require the particulars of the apparatus.
3. Inventions II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as usable together and operate on different principles: changes in electrical properties, thermal properties or weight.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, search and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Don Evenson on June 27, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose telephone number is (703) 308-3989. The examiner's schedule is variable between the hours of about 5:30 AM to about 5:00 PM on Monday through Thursday and alternate Fridays.

For communication by fax to the organization where this application or proceeding is assigned, (703) 305-7719 may be used for official, unofficial or draft papers.
